

Count Reduction in Myocardial Infarction Incidence for Alabama and Female

Count Reduction in Myocardial Infarction Incidence for Alabama and Male

Count Reduction in Myocardial Infarction Incidence for Alaska and Female

Count Reduction in Myocardial Infarction Incidence for Alaska and Male

Count Reduction in Myocardial Infarction Incidence for Arizona and Female

Count Reduction in Myocardial Infarction Incidence for Arizona and Male

Count Reduction in Myocardial Infarction Incidence for Arkansas and Female

Count Reduction in Myocardial Infarction Incidence for Arkansas and Male

Count Reduction in Myocardial Infarction Incidence for California and Female

Count Reduction in Myocardial Infarction Incidence for California and Male

Count Reduction in Myocardial Infarction Incidence for Colorado and Female

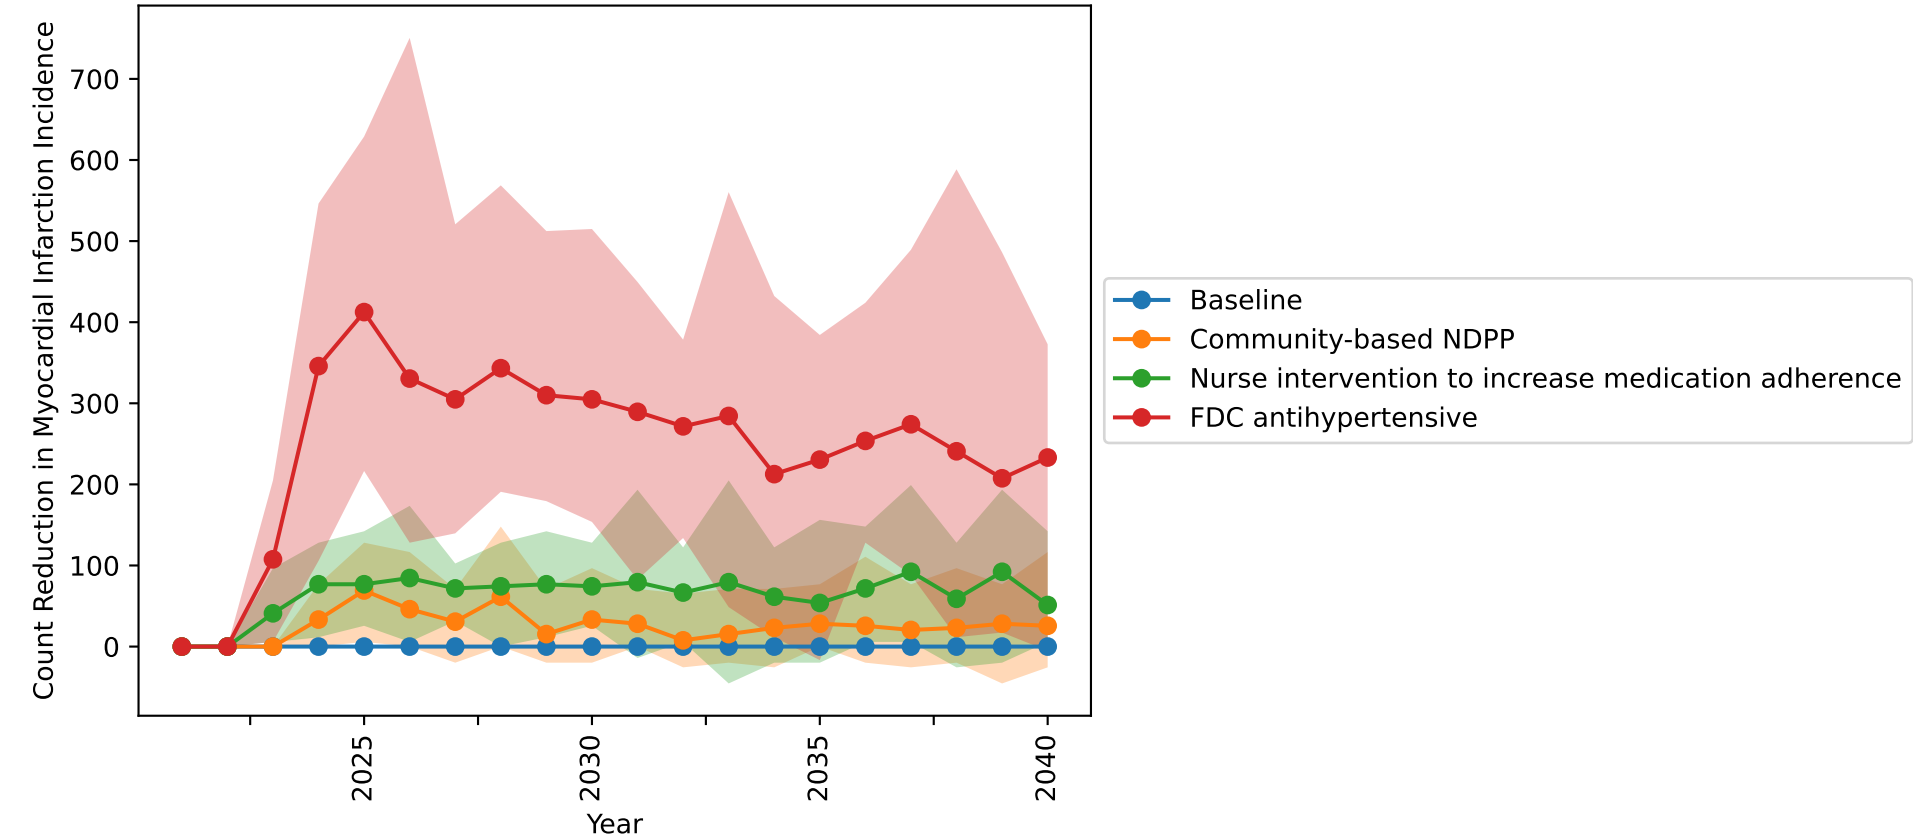

Count Reduction in Myocardial Infarction Incidence for Colorado and Male

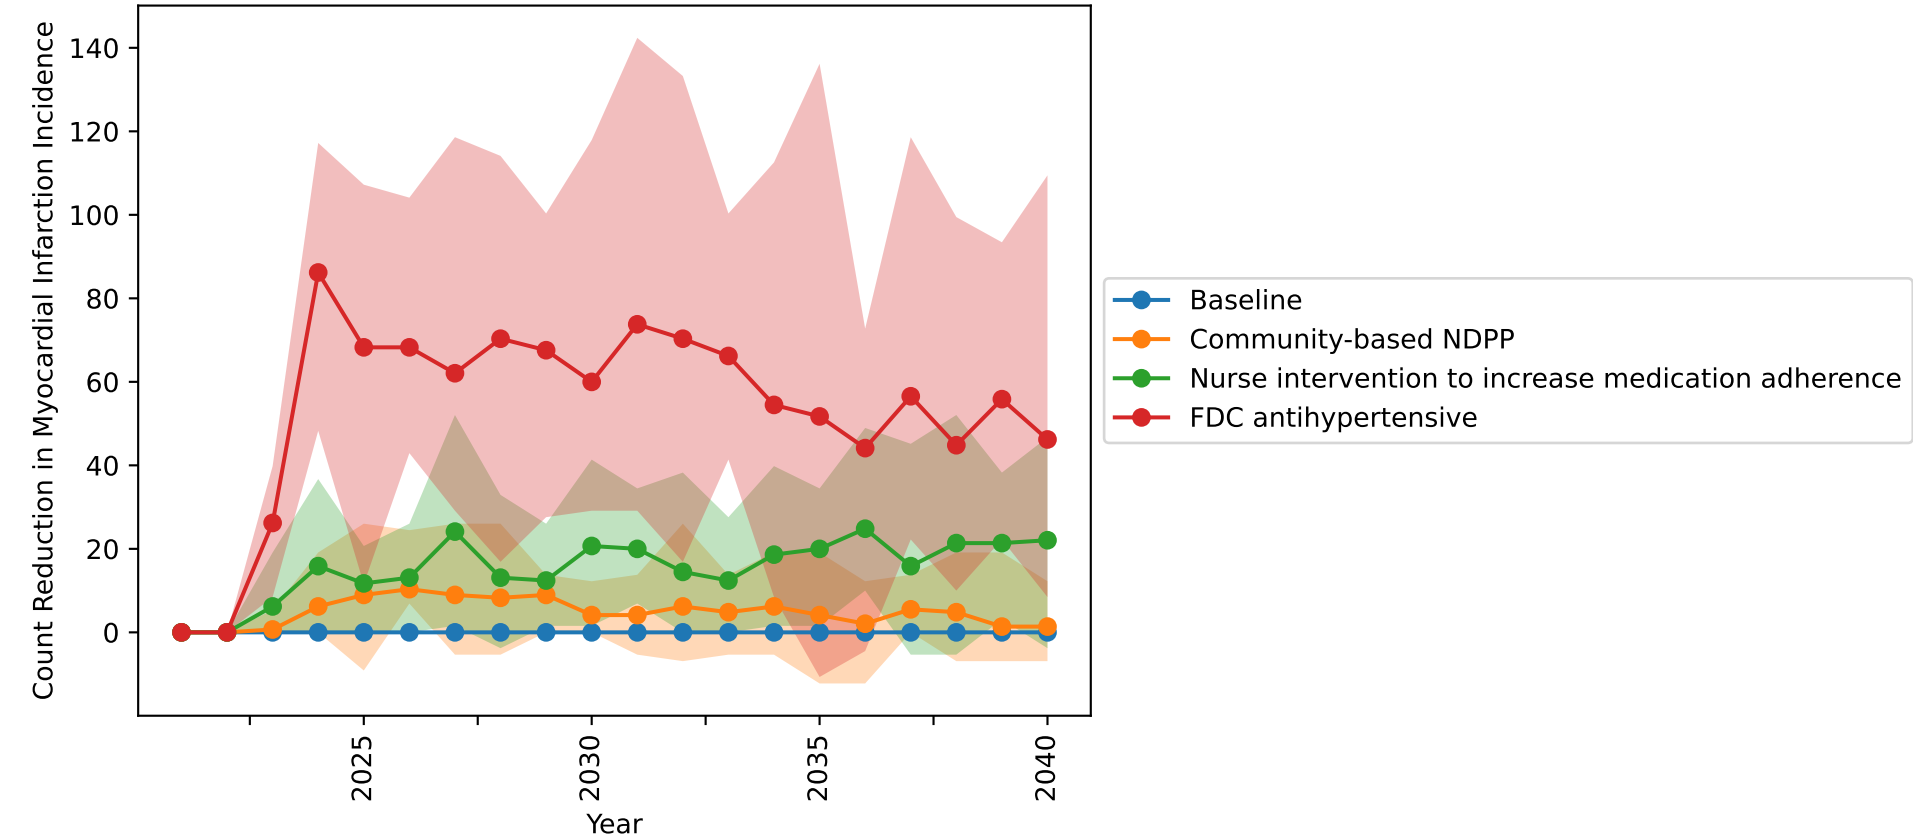

Count Reduction in Myocardial Infarction Incidence for Connecticut and Female

Count Reduction in Myocardial Infarction Incidence for Connecticut and Male

Count Reduction in Myocardial Infarction Incidence for Delaware and Female

Count Reduction in Myocardial Infarction Incidence for Delaware and Male

Count Reduction in Myocardial Infarction Incidence for Florida and Female

Count Reduction in Myocardial Infarction Incidence for Florida and Male

Count Reduction in Myocardial Infarction Incidence for Georgia and Female

Count Reduction in Myocardial Infarction Incidence for Georgia and Male

Count Reduction in Myocardial Infarction Incidence for Hawaii and Female

Count Reduction in Myocardial Infarction Incidence for Hawaii and Male

Count Reduction in Myocardial Infarction Incidence for Idaho and Female

Count Reduction in Myocardial Infarction Incidence for Idaho and Male

Count Reduction in Myocardial Infarction Incidence for Illinois and Female

Count Reduction in Myocardial Infarction Incidence for Illinois and Male

Count Reduction in Myocardial Infarction Incidence for Indiana and Female

Count Reduction in Myocardial Infarction Incidence for Indiana and Male

Count Reduction in Myocardial Infarction Incidence for Iowa and Female

Count Reduction in Myocardial Infarction Incidence for Iowa and Male

Count Reduction in Myocardial Infarction Incidence for Kansas and Female

Count Reduction in Myocardial Infarction Incidence for Kansas and Male

Count Reduction in Myocardial Infarction Incidence for Kentucky and Female

Count Reduction in Myocardial Infarction Incidence for Kentucky and Male

Count Reduction in Myocardial Infarction Incidence for Louisiana and Female

Count Reduction in Myocardial Infarction Incidence for Louisiana and Male

Count Reduction in Myocardial Infarction Incidence for Maine and Female

Count Reduction in Myocardial Infarction Incidence for Maine and Male

Count Reduction in Myocardial Infarction Incidence for Maryland and Female

Count Reduction in Myocardial Infarction Incidence for Maryland and Male

Count Reduction in Myocardial Infarction Incidence for Massachusetts and Female

Count Reduction in Myocardial Infarction Incidence for Massachusetts and Male

Count Reduction in Myocardial Infarction Incidence for Michigan and Female

Count Reduction in Myocardial Infarction Incidence for Michigan and Male

Count Reduction in Myocardial Infarction Incidence for Minnesota and Female

Count Reduction in Myocardial Infarction Incidence for Minnesota and Male

Count Reduction in Myocardial Infarction Incidence for Mississippi and Female

Count Reduction in Myocardial Infarction Incidence for Mississippi and Male

Count Reduction in Myocardial Infarction Incidence for Missouri and Female

Count Reduction in Myocardial Infarction Incidence for Missouri and Male

Count Reduction in Myocardial Infarction Incidence for Montana and Female

Count Reduction in Myocardial Infarction Incidence for Montana and Male

Count Reduction in Myocardial Infarction Incidence for Nebraska and Female

Count Reduction in Myocardial Infarction Incidence for Nebraska and Male

Count Reduction in Myocardial Infarction Incidence for Nevada and Female

Count Reduction in Myocardial Infarction Incidence for Nevada and Male

Count Reduction in Myocardial Infarction Incidence for Ohio and Female

Count Reduction in Myocardial Infarction Incidence for Ohio and Male

Count Reduction in Myocardial Infarction Incidence for Oklahoma and Female

Count Reduction in Myocardial Infarction Incidence for Oklahoma and Male

Count Reduction in Myocardial Infarction Incidence for Oregon and Female

Count Reduction in Myocardial Infarction Incidence for Oregon and Male

Count Reduction in Myocardial Infarction Incidence for Pennsylvania and Female

Count Reduction in Myocardial Infarction Incidence for Pennsylvania and Male

Count Reduction in Myocardial Infarction Incidence for Tennessee and Female

Count Reduction in Myocardial Infarction Incidence for Tennessee and Male

Count Reduction in Myocardial Infarction Incidence for Texas and Female

Count Reduction in Myocardial Infarction Incidence for Texas and Male

Count Reduction in Myocardial Infarction Incidence for Utah and Female

Count Reduction in Myocardial Infarction Incidence for Utah and Male

Count Reduction in Myocardial Infarction Incidence for Vermont and Female

Count Reduction in Myocardial Infarction Incidence for Vermont and Male

Count Reduction in Myocardial Infarction Incidence for Virginia and Female

Count Reduction in Myocardial Infarction Incidence for Virginia and Male

Count Reduction in Myocardial Infarction Incidence for Washington and Female

Count Reduction in Myocardial Infarction Incidence for Washington and Male

Count Reduction in Myocardial Infarction Incidence for Wisconsin and Female

Count Reduction in Myocardial Infarction Incidence for Wisconsin and Male

Count Reduction in Myocardial Infarction Incidence for Wyoming and Female

Count Reduction in Myocardial Infarction Incidence for Wyoming and Male
