

Count Reduction in Myocardial Infarction for Alabama and Female

Count Reduction in Myocardial Infarction for Alabama and Male

Count Reduction in Myocardial Infarction for Alaska and Female

Count Reduction in Myocardial Infarction for Alaska and Male

Count Reduction in Myocardial Infarction for Arizona and Female

Count Reduction in Myocardial Infarction for Arizona and Male

Count Reduction in Myocardial Infarction for Arkansas and Female

Count Reduction in Myocardial Infarction for Arkansas and Male

Count Reduction in Myocardial Infarction for California and Female

Count Reduction in Myocardial Infarction for California and Male

Count Reduction in Myocardial Infarction for Colorado and Female

Count Reduction in Myocardial Infarction for Colorado and Male

Count Reduction in Myocardial Infarction for Connecticut and Female

Count Reduction in Myocardial Infarction for Connecticut and Male

Count Reduction in Myocardial Infarction for Delaware and Female

Count Reduction in Myocardial Infarction for Delaware and Male

Count Reduction in Myocardial Infarction for Florida and Female

Count Reduction in Myocardial Infarction for Florida and Male

Count Reduction in Myocardial Infarction for Georgia and Female

Count Reduction in Myocardial Infarction for Georgia and Male

Count Reduction in Myocardial Infarction for Hawaii and Female

Count Reduction in Myocardial Infarction for Hawaii and Male

Count Reduction in Myocardial Infarction for Idaho and Female

Count Reduction in Myocardial Infarction for Idaho and Male

Count Reduction in Myocardial Infarction for Illinois and Female

Count Reduction in Myocardial Infarction for Illinois and Male

Count Reduction in Myocardial Infarction for Indiana and Female

Count Reduction in Myocardial Infarction for Indiana and Male

Count Reduction in Myocardial Infarction for Iowa and Female

Count Reduction in Myocardial Infarction for Iowa and Male

Count Reduction in Myocardial Infarction for Kansas and Female

Count Reduction in Myocardial Infarction for Kansas and Male

Count Reduction in Myocardial Infarction for Kentucky and Female

Count Reduction in Myocardial Infarction for Kentucky and Male

Count Reduction in Myocardial Infarction for Louisiana and Female

Count Reduction in Myocardial Infarction for Louisiana and Male

Count Reduction in Myocardial Infarction for Maine and Female

Count Reduction in Myocardial Infarction for Maine and Male

Count Reduction in Myocardial Infarction for Maryland and Female

Count Reduction in Myocardial Infarction for Maryland and Male

Count Reduction in Myocardial Infarction for Massachusetts and Female

Count Reduction in Myocardial Infarction for Massachusetts and Male

Count Reduction in Myocardial Infarction for Michigan and Female

Count Reduction in Myocardial Infarction for Michigan and Male

Count Reduction in Myocardial Infarction for Minnesota and Female

Count Reduction in Myocardial Infarction for Minnesota and Male

Count Reduction in Myocardial Infarction for Mississippi and Female

Count Reduction in Myocardial Infarction for Mississippi and Male

Count Reduction in Myocardial Infarction for Missouri and Female

Count Reduction in Myocardial Infarction for Missouri and Male

Count Reduction in Myocardial Infarction for Montana and Female

Count Reduction in Myocardial Infarction for Montana and Male

Count Reduction in Myocardial Infarction for Nebraska and Female

Count Reduction in Myocardial Infarction for Nebraska and Male

Count Reduction in Myocardial Infarction for Nevada and Female

Count Reduction in Myocardial Infarction for Nevada and Male

Count Reduction in Myocardial Infarction for Ohio and Female

Count Reduction in Myocardial Infarction for Ohio and Male

Count Reduction in Myocardial Infarction for Oklahoma and Female

Count Reduction in Myocardial Infarction for Oklahoma and Male

Count Reduction in Myocardial Infarction for Oregon and Female

Count Reduction in Myocardial Infarction for Oregon and Male

Count Reduction in Myocardial Infarction for Pennsylvania and Female

Count Reduction in Myocardial Infarction for Pennsylvania and Male

Count Reduction in Myocardial Infarction for Tennessee and Female

Count Reduction in Myocardial Infarction for Tennessee and Male

Count Reduction in Myocardial Infarction for Texas and Female

Count Reduction in Myocardial Infarction for Texas and Male

Count Reduction in Myocardial Infarction for Utah and Female

Count Reduction in Myocardial Infarction for Utah and Male

Count Reduction in Myocardial Infarction for Vermont and Female

Count Reduction in Myocardial Infarction for Vermont and Male

Count Reduction in Myocardial Infarction for Virginia and Female

Count Reduction in Myocardial Infarction for Virginia and Male

Count Reduction in Myocardial Infarction for Washington and Female

Count Reduction in Myocardial Infarction for Washington and Male

Count Reduction in Myocardial Infarction for Wisconsin and Female

Count Reduction in Myocardial Infarction for Wisconsin and Male

Count Reduction in Myocardial Infarction for Wyoming and Female

Count Reduction in Myocardial Infarction for Wyoming and Male
